

Travel Regulations During the Period of the National Emergency

Referring to the Government Decree 40/2020 (III.11.) on the State of Emergency, the General Regulations of EKU have been modified as follows:

No foreign travel will be permitted during the national emergency and all pre-authorized travel permits will be suspended.

Guests from abroad can only be received if their presence is essential and all immigration rules applicable on their arrival have been fully adhered to. Any colleagues returning from countries considered to represent a particular risk regarding coronavirus (presently China, South Korea, Iran, Italy and Israel) will be subject to the separation, observation and quarantine rules as formulated in decree 41/2020 (III. 11.) 3§. We would ask all colleagues to refrain from travel abroad even while on leave. Should any colleague leave the territory of Hungary they are required to report this using the following email address: tavollet@uni-eszterhazy.hu.

International students will be provided accommodation and access to on-line teaching materials and services. Their return home prior to the end of the term is possible at their own risk and must be reported using a form produced for this purpose. Students who decide to stay in university accommodation may not travel abroad with the exception of travelling home.
